

## Company Profile

### ITNMC Management Team

Our core management teams represent a rich background of technical and management experience in companies such as Microsoft, Boeing, Pacific Bell, Alcatel, DataFab, Prudential Securities, & The Internal Revenue Service. Our teams' extensive experience with integrated back-end solutions, applications and enterprise level servers; is paired with extensive background in IT infrastructure, enterprise networks and business processes. ITNMC will successfully implement projects ranging in size from small office solutions to complete enterprise level infrastructure solutions that are tailored to specific needs.

### ITNMC Project Teams

Special Project teams are created whenever projects are engaged. The teams always consist of at least one member of our core management team. Team members are hand selected for their experience, fields of expertise, and relevance to project requirements. Even with the vast array of experience and expertise we have at ITNMC, we never assume to know more about the business or industry of our client. We make utilize our relationship network of Associates to implement the best people and resources for the engagement. Excellent management combined with quality teams is the best path to successful implementation.
